GUIDE TO THE NT14 PLATEAU YUMANS (HAVASUPAI) FILE

[The Havasupai have been selected as the Plateau Yuman sample group. Most of the material is subheaded for Havasupai although some information has been marked for other Plateau groups. There are 14 sources in the file, all of them in English.

The basic sources are 1: Spier, 4: Smithson, and 14: Smithson and Euler. These were written by professional ethnographers, and offer general information on Havasupai culture. Considerable historical depth is present through the sources by Iliff, James, Shufeldt, Cushing and Curtis, all of which were written before Western culture had influenced the Havasupai to any extent.

The file is probably above average in coverage of material culture, economy, women's activities, and certain aspects of culture. The file is weak in information on physical anthropology, language and socialization. The file was processed between 1961 and 1968.]
